

Create the following web app for a mobile shop.

A customer can choose several products in step 1.

Then there are two payment methods:

- Cash (-20%)
- Credit (+20%)

Step 1: Choose products <input type="checkbox"/> Iphone 15 (32,900 baht) <input type="checkbox"/> Iphone 15 Pro (41,900) <input type="checkbox"/> Iphone 15 Max (48,900)	Step 2: Choose payment method Cash (-20%)	Step 3: Payment Pay
--	---	-------------------------------

If you forgot to choose any product, an alert dialog shows.

Step 1: Choose products <input type="checkbox"/> Iphone 15 (32,900 baht) <input type="checkbox"/> Iphone 15 Pro (41,900) <input type="checkbox"/> Iphone 15 Max (48,900)	<div>127.0.0.1:5500 says Please select at least a product</div> <div>Cash (-20%)</div>	Step 3: Payment Pay
--	--	-------------------------------

If we choose some products, and pay with cash.

Step 1: Choose products <input checked="" type="checkbox"/> Iphone 15 (32,900 baht) <input type="checkbox"/> Iphone 15 Pro (41,900) <input checked="" type="checkbox"/> Iphone 15 Max (48,900)	Step 2: Choose payment method Cash (-20%)	Step 3: Payment You select 2 product(s) Total price = 65440 baht Pay
--	---	--

But if pay with credit,

Step 1: Choose products <input checked="" type="checkbox"/> Iphone 15 (32,900 baht) <input type="checkbox"/> Iphone 15 Pro (41,900) <input checked="" type="checkbox"/> Iphone 15 Max (48,900)	Step 2: Choose payment method Credit (+20%)	Step 3: Payment You select 2 product(s) Total price = 98160 baht Pay
--	---	--
